From: Christine Emerson, Director
School Nutrition Programs

Re: **Instructions for Verification:** LEAs with **less than 80%** household response rate in the previous school year

Verification is the process by which Local Educational Agencies (LEAs) confirm the eligibility of a sample of approved applications for free and reduced-price meals. The verification process must be completed by **November 15, 2008**, and LEAs must submit the Summary of Verification form to this office by December 15, 2008. It is highly recommended that schools separate applications based on the categories listed on the Summary of Verification form (1.a through 2). Separating the applications as they come in will ease the verification procedure immensely.

The following prototype letters are available at <http://www.opi.mt.gov/schoolfood/index.html> and are required to successfully complete the verification process. If you have trouble downloading any of these forms, please contact our office at (406) 444-2501.

- Notification of Selection for Verification of Eligibility Letter (*front and back*)
- Notification of Results of Verification of Eligibility Letter

Verification does **not** apply to:

- Children in split-session kindergarten programs participating in the Special Milk Program;
- Residential Child Care Institutions, except for applications for attending day students;
- Schools in non-base years using Special Provisions 2;
- Households whose determinations are directly certified as eligible for free meals using Department of Public Health and Human Services letters and food stamp reports;
- Homeless, migrant and/or runaway students identified by the LEAs homeless liaison; and
- Non-applicants approved by local officials (administrative applications).

See the following instructions for verification activities. For more information, use the *Eligibility Guidance for School Meals Manual*:

<http://www.fns.usda.gov/cnd/Governance/notices/iegs/EligibilityManual.pdf> (starting on page 62) or call School Nutrition Programs at (406) 444-2501.

Enclosures

Instructions for Verification Activities (Error Prone Method)

Beginning of School Year to October 1

Collect and approve applications for free and reduced-price meals.

October 1

Count the number of family **applications** approved for free and reduced-price meals as well as the number of **students** approved on household applications as of **October 1**. *Directly certified, homeless and administrative students are not eligible for verification, but the number of students must be included on the Summary of Verification.*

1. Calculate the sample size of 3 percent using **all** approved **applications** on file as of October 1 (1.b through 2 – all applications except directly certified, homeless or administrative). Round fractions up to whole numbers.
2. Draw the required number of **applications** from **only** the error prone applications. Do **not** verify any less than or more than 3% of applications for the formal verification process.
 - If there are more error-prone applications than needed for the minimum sample size, select a random sample from those applications.
 - If there are not enough error-prone applications to meet the minimum sample size, draw the remainder needed from among the other applications.
 - At least one income application must be verified, choosing error-prone applications first.
3. Once the applications have been drawn for verification, a “preliminary review” must be conducted. A person other than the determining official must check the applications pulled for verification to ensure that they were determined correctly before the verification process can proceed.
4. Send prototype notification letters to the selected households.
 - The household should have ten working days to submit income documentation.
 - The household may provide proof that the child is a member of a household receiving assistance under the Food Stamp Program, TANF or FDPIR instead of providing income information and social security numbers of adult household members.
 - The household must be provided with a name of the person at the school who can answer questions and provide assistance and no-cost telephone number.
 - If a household does not respond, schools must follow-up with that household at least once before that household is deemed non-responsive and meal benefits are ceased. See “Reducing the Burden of Verification.”
 - If a household selected for verification transfers out of the district before the information can be verified, a new application must be selected for verification.
5. Once responses have been received, re-determine the household’s benefits and send the prototype notification of results of verification letter to the households.

November 15

All verification activity must be completed by **November 15** (steps 1 through 5 above).

November 15 to December 15

Complete the Summary of Verification form and send to School Nutrition Programs by **December 15, 2008** (keep copies of original applications, letters to households, and the Summary of Verification form on file at the school).

Definitions

Directly Certified

Students determined as eligible for free meals using data from Department of Public Health and Human Services letters and food stamp reports.

Error-Prone Applications

Applications within \$100 per month or \$1,200 per year of the Income Eligibility Guidelines.

Verification for Cause

The LEA has an obligation to verify all questionable applications (for cause). However, verification that is done “for cause” is **in addition to** and **should not be included** in the sample required for the formal verification process.

It is important to note the fine distinction between *calculating* the sample size and *drawing* the sample applications. *Calculate* the number of applications to be reviewed (the sample size) from **all** the applications except directly certified students. *Draw* the required number of applications from **only** the error-prone applications.
